

U-table duravan

This table has a frame made from curved flat-oval tubing. A central tube that acts like a 'backbone' makes the frame extra-sturdy. The connecting tubes on the long sides have an extra function: they ensure that VANERUM Delta chairs can be hung on the tables: this leaves both tabletop and floor completely free, making it much easier to clean the room. Each leg has a large-format adjustable cap.

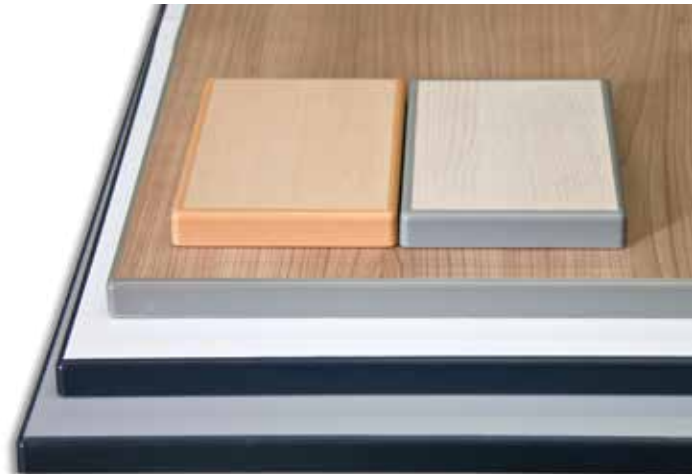

MATERIAL:

Duravan

The top has a synthetic resin coating on both sides and is additionally protected by a transparent anti-scratch layer. The core is chipboard complying with DIN 68765/E1. The buffer edge is a cast-in, hard elastic polyurethane edge (6 mm) in a colour matching with that of the top layer. Top end corners are rounded off to a 6 mm radius.

Lacquered support

The (steel) legs are coated with a layer of an epoxy and/or polyester resin-based powder. The process is extremely environment-friendly, because no solvent is involved, the powder being applied electrostatically and any surplus being recycled. The result is particularly wear-resistant and affords a high degree of resistance to damage and scratching.

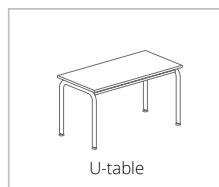

Finish and construction.

The support is a robustly welded construction made from cold-formed 60x30x2 mm oblong tube legs, centrally connected by a 50x30x2 mm square tube and on the sides two 25x1.5 mm round tubes. The support is welded by the MIG process. The free space between the legs is the top length minus 80 mm and the top depth minus 140 mm. The support is finished with an epoxy and/or polyester resin powder coating and is available in various standard RAL colours. The legs are equipped with plastic levelling caps Ø 60 mm enabling the desk to be placed in a stable horizontal position, regardless of the condition of the floor. The top is mounted on the support by means of screws. An additional feature is the suspension option of certain seats under the table top. In this case, the seat rests on the connection tubes of the desk support and the seat is positioned by plastic buffers under the table top.

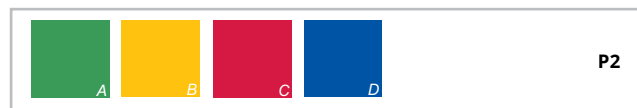

DIMENSIONS

The desk is available in seven different heights and comprises square, rectangular and trapezoidal tops in various coordinated sizes.

- 55 x 70 cm
- 55 x 130 cm
- 65 x 75 cm
- 65 x 130 cm
- 65 x 150 cm
- 65 x 150/85 cm
- 70 x 120 cm
- 70 x 175 cm
- 80 x 80 cm
- 80 x 120 cm
- 80 x 160 cm
- 70 x 140 semicircular
