

e3 enamel SB (SHELLBOARD) whiteboard

The SB (SHELLBOARD) whiteboard easily integrates in learning environments and offices thanks to its sober and elegant framing in anodised aluminium. Only 4 mounting points guarantee an easy mounting. The board is available in dimensions between 45x60 cm and 120x300 cm and in ratios 4:3 and 16:10, allowing an optimal usage with video projectors.

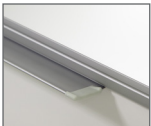

Invisible mounting

Grey polypropylene corners close like a shell and hide the mounting screws.

Safety and environmental protection

The SB whiteboard is certified by NF Education, NF Environnement and PEFC, which guarantee the users' safety and the environmental protection. The writing surface has a lifelong warranty*.

e3 enamel writing surface with lifelong warranty*

The e³ environmental ceramicsteel writing surface, which is 99% recyclable and has a lifelong warranty, is easy to write and erase on and is highly resistant to scratches, bacteria and chemical products. This enables the user to enjoy the board a lifetime.

**Normal usage*

Writing = White smooth

The board has smooth white enameled steel surface, suitable to writing with markers (dry erase whiteboard markers) and magnets.

Writing + projection = White semi matt

The board has a white semi-matt enameled steel surface, suitable for projection and to writing with markers (wet erase whiteboard markers with a moist cloth) and magnets.

Projection = White matt

The board has a white matte enameled steel surface, suitable for projection, NOT suitable for writing with markers and magnets.

TECHNICAL FEATURES

MATERIAL

- Writing surface in e3 enamel steel, vitrified at 800°C. Lacquered white for dry-wipe markers, projection white for projecting, mat green or blue for chalk. The magnetic writing surface allows the usage of magnets.
- Core in high density fibreboard (8 mm), certified by PEFC and 99% recyclable.
- Dimensions of up to 120x200 cm are counterbalanced by an aluminium plate which protects the board against deformations due to moisture. Larger dimensions and white projection surfaces are protected by a galvanized plate, which ensures perfect flatness of the board during its entire lifespan.
- Glued together by polyurethane adhesive without VOC emissions
- Elegant framing in smooth anodised aluminium
- Grey polypropylene corners.

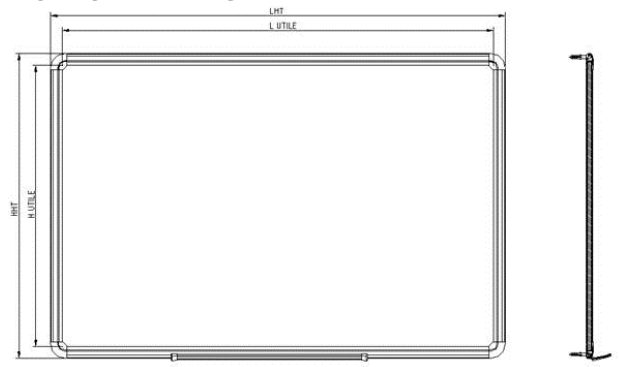

ACCESSORIES

- Supplied with a clip-on anodised pen tray with plastic end caps. Length of the tray corresponds to the shortest side of the board.
- Supplied with mounting instructions and screws for fixation on a solid wall.

CERTIFICATES & FIRE CLASSIFICATION

- Product certified by NF Éducation, NF Collectivité et NF Environnement.
- PEFC certified fibreboard
- Manufactured in a French factory, certified by ISO 9001, OHSAS 18001 and ISO 14001.
- Fire classification M1

TECHNICAL DRAWING

OPTIONS

- Other special dimensions
- Lighting
- Magnetic mounting for dimensions below or equal to 100x150 cm with galvanized backing.
- Other paint colors for the framing according to the RAL samples given below. These are just some of the many possibilities:

RAL 1003 RAL 5002 RAL 9006 RAL 5018 RAL 3031 RAL 9005

e3 enamel available in two different vitrification qualities

- Felt or glossy white enamel recommended for writing with markers and for usage with ultra short throw projectors. The surface is dry erased.
- Projection or semi-glossy (or semi-mat) white enamel recommended for projections with short throw or portable projectors. The surface is erased with a damp cloth.

Other enamel colors: green, black, grey or chalk blue

Available enamel lineation

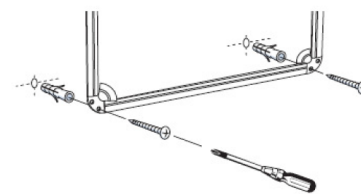

- Lineation group 1 on green and white enamel: Séyès, grid 2x2 cm emphasized every 10 cm, grid 5x5 or 10x10 cm
- Lineation group 2 on green and white enamel: staff, kindergarten, line of 5 or 10 cm, grid 1x1 cm emphasized every 5 cm.

MOUNTING

Horizontal or vertical mounting for dimensions up to 1000 x 15000 mm.

Can be achieved in 3 steps, described in the instructions:

- Indicate the hole positions on the wall where the four corners of the board will be attached
- Drill holes and mount the board onto the wall by means of the provided mounting screws (solid wall)
- Attach the pen tray
